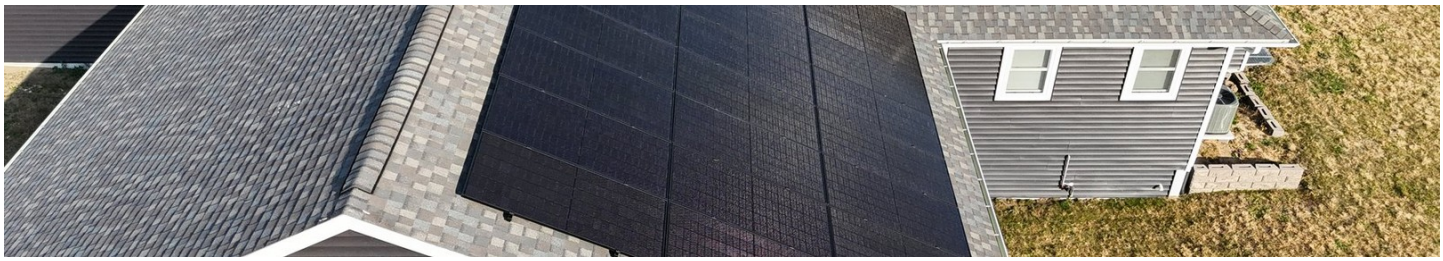
LYDON ELECTRIC & SOLAR

RESIDENTIAL SOLAR

SPARTA + WESTERN WISCONSIN

Your roof. Your power.
A plan that makes sense.

Generate electricity at home with a system designed around your usage and budget. See whether the costs and expected savings make sense for you.



A local Lydon residential solar installation.

WHAT YOU GAIN

- **Put your property to work.** Explore solar that offsets part of your purchased electricity, with size and layout matched to your usage, roof, or ground space.
- **Understand the numbers behind the proposal.** Review estimated production, costs, utility billing assumptions, and any applicable incentives together.
- **Work with a local electrical and solar team.** Coordinate design, installation, permits, and utility interconnection with Lydon. Optional backup can be planned around selected loads.

YOUR PROJECT MAY INCLUDE

- ✓ Roof or ground-mount options
- ✓ Electrical integration
- ✓ Equipment and warranty review
- ✓ System planning around your usage
- ✓ Permit and utility coordination
- ✓ Optional battery backup

Sparta-based. Built on an electrical legacy since 1975, with NABCEP PVIP expertise and real installations across the region.

Have ready: Property address, a recent electric bill if available, and your main goals.

Solar savings vary. A utility bill may remain. Outage power requires a suitable backup system.
